Education

Codeup

Certification of Completion

May 2022 - Oct 2022

Full-Stack Java Career Accelerator that is a 20-week, fully-immersive, and intensive program that provides students with 670 hours of expert instruction in software development through project-based learning.

As a Full-stack Software Developer, I possess a diverse skill set in building websites and creating innovative, scalable programs. My experience in utilizing the latest technologies to optimize efficiency and deliver holistic outcomes sets me apart. I am committed to continuous learning and staying up-to-date with emerging technologies to produce high-quality code. With a strong focus on problem-solving and collaboration, I am dedicated to delivering exceptional results and contributing to the growth and success of any organization.

Development Projects

Coffee Project

The Coffee Project is a dynamic web application created using paired programming techniques and leveraging CSS, HTML, and JavaScript. The platform features a vast selection of coffees and roasts that users can easily search based on name or roast preference. Users can personalize their coffee selection by adding or removing preferred coffees, resulting in a highly satisfying user experience.

Movie Project

The Movie Project is a paired programming website that leverages CSS, HTML, APIs, and JavaScript to filter through a large movie database and generate rotating movie posters with detailed descriptions on the back. The website features a user-friendly search bar that enables users to search by name and easily find movies by rating, description, and genre. The project demonstrates proficiency in web development technologies and showcases the ability to create engaging user experiences.

Star Wars Project

The Star Wars Project is a solo project that demonstrates proficiency in HTML, JavaScript, and CSS. The project showcases the ability to recreate the iconic opening crawl of the Star Wars movies and highlights expertise in CSS styling. The project features a user-friendly interface that enables users to input their desired text for the display.

GameFace Productions

GameFace is a social media platform that leverages HTML, CSS (Bootstrap), and JavaScript for the front end and Java using Spring Boot, Amazon RDS, and Amazon S3 for the backend. The project features Google authentication, enabling users to create personalized profiles that showcase their platform of choice, gamertags, and favorite games through the RAWG API. Users can connect with others through posts, likes, comments, and highlights using the Filestack API. The platform allows users to find gaming partners based on games played, region, skill, and play style, fostering a safe and inclusive environment for gamers to connect and grow.

Canvas Project

The Canvas Project is a front-end web application that highlights proficiency in HTML, JavaScript, and CSS. The project features a blank canvas that enables users to draw freehand or using various shapes. The application showcases expertise in HTML5, CSS, and vanilla JavaScript, demonstrating the ability to build complex applications without relying on external frameworks or libraries. Users can also erase their drawings or download them as images, facilitating easy sharing and saving of artwork. The Canvas Project underscores skills as a full-stack developer and passion for web development.

Professional Experience

Inerso - San Antonio, TX

Web Developer / May 2023 - June 2024

- Leveraged Figma to conceptualize and design innovative pages for the Air Force portal, ensuring user-friendly interfaces and intuitive navigation
- Developed dynamic web pages utilizing JavaScript and CSS, translating Figma designs into functional and visually appealing websites
- Designed and implemented user-friendly pages for the Air Force portal using SharePoint Online.
- Integrated HTML, CSS, and JavaScript to support accurate and appealing digital content.
- Facilitated effective communication with clients and senior management to understand and fulfill their requirements for page design promptly

TCB Tax - San Antonio, TX

Receptionist / June 2024 - Present
